We are pleased to announce the 1st web-conference on Translational Imaging for Psychopharmacology which will focus on MRI based methodology not only to understand the effect of psychotropic drugs on the brain of humans and animals, but also to help translational research. As the ultimate goal is to enhance drug design and development, representatives from the pharmaceutical industry will come to define the needs and share their experience with academics.

Although physically located at the University of Basel, the web-conferencing formula will also allow remote attendance to the conference. Beyond the sharing of knowledge, this conference seeks to gather the community interested in this subject. Accordingly, we invite all the researchers around the world to contact us and to attend for free. We will do our best to allow remote attendees to interact with the panel.

Organizer: Jack Foucher
Registration and more info on www.neurex.org or contact: Pascale.Piguet@unibas.ch
